NEUROGENERATION INVITED SPEAKER AT SHANGHAI'S INTERNATIONAL REGENERATIVE MEDICINE AND STEM CELLS SYMPOSIUM

SHANGHAI, CHINA and LOS ANGELES, CALIFORNIA, December 13, 2010 /Newswire/ -- Dr Michel F. Levesque was a guest speaker at the International Regenerative Medicine and Stem Cells symposium held here in Shanghai, China. His presentation "*Biotherapeutics for Neurodegenerative disorders*" focused on NeuroGeneration 's pipeline for new therapies for aging and degenerative disorders of the nervous system like Parkinson's disease and Alzheimer's disease. Dr Levesque took the opportunity to meet potential collaborators and investors in China and visited the Shanghai Stem Cell Institute and Nanjing University.

ABOUT NEUROGENERATION:

NeuroGeneration, a biotechnology company, is engaged in the research and development of biological products for the prevention and repair of aging and degenerative disorders. The company is entering a Phase II study for the treatment of Parkinson's disease and Phase I studies for multiple systems atrophy, atypical parkinsonism and thalamic stroke. The company was founded in 1998 and is headquartered in Los Angeles, California.
